

# Health & Safety Policy

*A safe & healthy workplace contributes to business success*

At **Multirethanes** we are committed to preventing work-related ill-health and injury, and to support the general health and well-being of all company personnel.

We endeavor to provide a hazard free environment. We minimize risks by adherence and compliance with the requirements of legislation and internal operating standards.

We are committed to continuous improvement of our occupational health and safety performance with the involvement of all company personnel.

At **Multirethanes**, we believe that all workplace injuries, incidents, equipment damage, occupational illnesses, diseases and workplace violence or harassment are preventable.

**Multirethanes** require that health and safety be a primary objective in every area of company operations.

To this end, we will endeavor to abide by the Health and Safety Bill of Rights and Obligation's, and our Mission Statement on Safety, which will not be limited to the following:

1. Think through each task, look for hazards, assess the consequences, take precautions and do the job safely
2. Ensure that all personnel have a clear understanding of safe working methods for their assigned tasks
3. Provide personnel with education, training and shared knowledge to help them take personal responsibility for maintaining and improving their own health and safety
4. Ensure compliance with our health & safety policies and standards through regular audits and reviews
